

Latvian Institute of Organic Synthesis (LIOS) receives €2.5 M ERA Chair grant from Horizon Europe Framework Programme

Published more than 2 years ago

Published: 03.11.2022.

The aim of ERA Chair project “Natural Products Research at Latvian Institute of Organic Synthesis as a Driver for Excellence in Innovation (Natalion)” is to promote innovation excellence of LIOS by the establishment of Natural Products Research (NPR) group and implementation of LIOS Innovation hub as a complementary structural change. The aim of the project will be achieved under the competent guidance of the ERA Chair holder Dr. Stefano Donadio and collaboration with company NAICONS (Italy). Dr. Stefano Donadio is a scientist with an excellent track record in NPR and outstanding leadership skills. He is a founder and CEO of Biotech company NAICONS and has over 30 years of industrial experience in antibiotic discovery and development.

“Natural products have revitalized the interest of the drug discovery community as a result of impressive scientific and technological advances in the field. Natalion will be an efficient engine to develop new technologies and products with high innovation potential, and I am proud that NAICONS, with its powerful platform in natural products, will be part of the project. Natalion is expected to facilitate the institutional environment fostering innovations and entrepreneurial culture and to promote brain circulation for researchers and innovators,” says Dr. Stefano Donadio.

The excellence of research and innovation will be attained by setting up NPR group comprising high level scientists and integrating the operations into internal and external collaboration networks. Sourcing of natural products with wide spectrum of biological activity will strongly synergize with the existing LIOS competencies in drug discovery.

ERA Chairs are grant schemes under Widening Participation and Spreading Excellence actions of H2020 and Horizon Europe

framework programmes. The grants are focused on implementation of institutional changes and increasing research capacity in Widening countries. LIOS is proud to be the first Latvian research organization receiving ERA Chair grant, which will contribute to its ambitious goal of becoming one of the leading EU research centers.

About LIOS: LIOS is the leading drug discovery and development center in the Baltics with a broad spectrum of expertise including medicinal chemistry, organic synthesis, *in vitro* and *in vivo* pharmacology, bioanalytics, computational modeling, biophysical chemistry, structural biology, and process chemistry. LIOS has a strong focus on collaboration with industry and is a part of a wide academic network including 11 EU funded research consortia and EU-OPENSOURCE ERIC.

About NAICONS: NAICONS Srl is a biotechnology company based in Milan, Italy. Thanks to a world-class technology platform and knowhow on Natural Products NAICONS is building the Micro4all platform, the first Molecule Search Engine that is going to disrupt the Drug Discovery Process.
