LATVIA

# Project goal

To develop a **competence model for academic staff** – grounded in educational sciences, human resource management theories, and international best practices – **that supports the transition to the New Academic Career Framework** in Latvian higher education institutions and research institutes.

# Project goal

The model will include components for:

- **competence assessment,**
- identification of **learning needs,**
- professional **development planning,**

aligned with institutional typologies and academic career stages.

# Project goal

Components will be applicable for:

- institutional **human resource policy** development,
- internal and external **quality evaluation and enhancement.**

# Outcomes

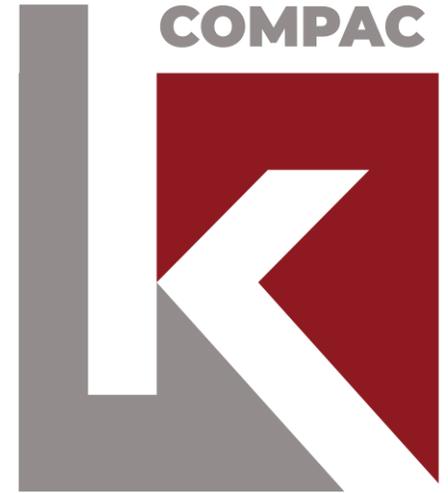

## Validated prototype of an assessment tool

- Examples of **micro-module designs** for the professional development of academic staff
- **Guidelines** for higher education institutions and research institutes on implementing the competence model
- **Policy recommendations** for the implementation of the competence model
- **Disseminated project results** within the academic and professional community and to the wider public, both nationally and internationally

# Completed tasks

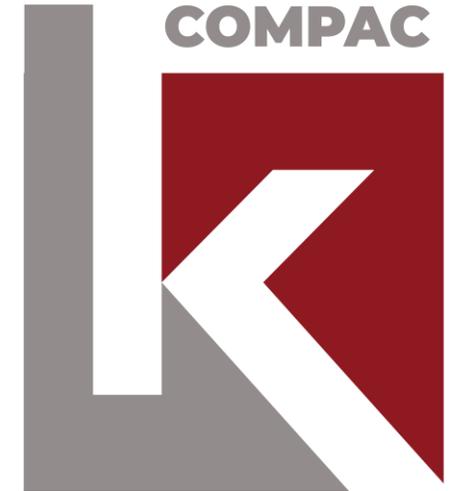

1

analysis of literature, policy documents, and international practice

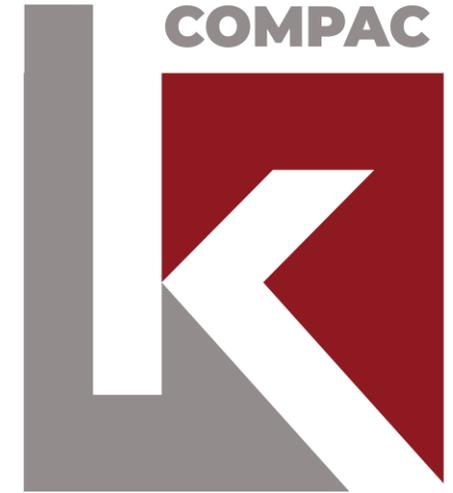

# Completed tasks

<b>1</b>	<b>analysis of literature, policy documents, and international practice</b>
<b>2</b>	<b>description of competence levels</b>

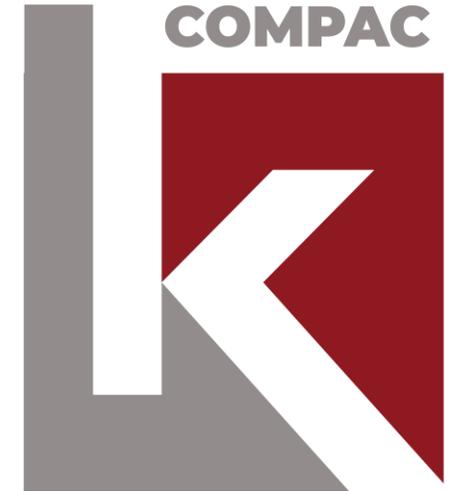

# Completed tasks

<b>1</b>	<b>analysis of literature</b> , policy documents, and international practice
<b>2</b>	description of <b>competence levels</b>
<b>3</b>	<b>performance level descriptors</b> aligned with career stages and academic positions

# Work in progress

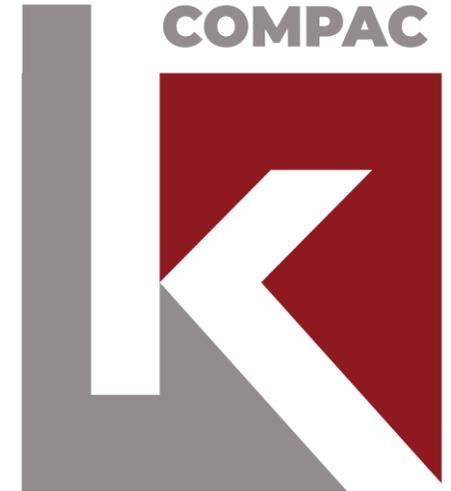

1	analysis of literature, policy documents, and international practice
2	description of competence levels
3	performance level descriptors aligned with career stages and academic positions
4	assessment system

# Future deliverables

5

prototype of the **competence assessment and learning-needs identification tool**

# Future deliverables

5

prototype of the **competence assessment** and learning-needs identification **tool**

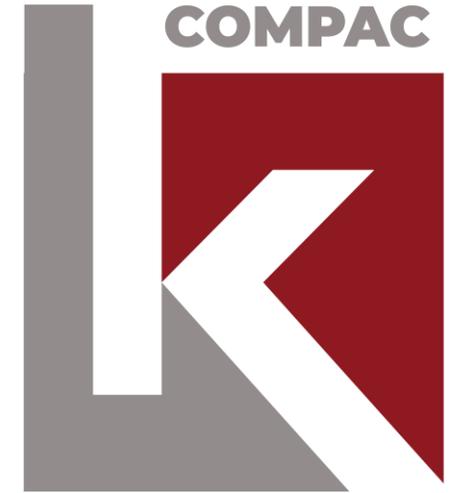

6

sample designs of **micro-modules** for competence-based professional development

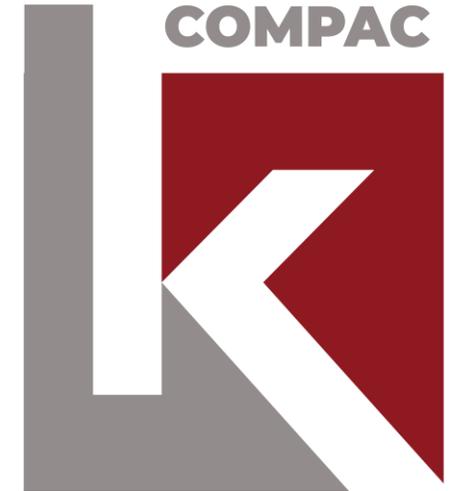

# Future deliverables

5	prototype of the <b>competence assessment</b> and learning-needs identification <b>tool</b>
6	sample designs of <b>micro-modules</b> for competence-based professional development
7	<b>guidelines</b> for implementing the model in higher education institutions and research institutes

# Future deliverables

5	prototype of the <b>competence assessment</b> and learning-needs identification <b>tool</b>
6	sample designs of <b>micro-modules</b> for competence-based professional development
7	<b>guidelines</b> for implementing the model in higher education institutions and research institutes
8	<b>recommendations</b> for education policy development and regulatory framework design

# Competence descriptions

- descriptions of competences in **research, pedagogy, organization, and knowledge transfer**
- description of every competence is formulated **at a foundational level**
- **a guiding principle** assigned for each academic career stage

## Junior Academic Staff

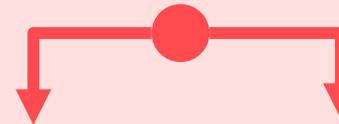

ensures high-quality delivery of processes

## Qualified Academic Staff

innovates

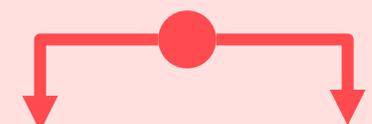

## Highly Qualified Academic Staff

mentors

shares evidence-based practice

## Leading Academic Staff

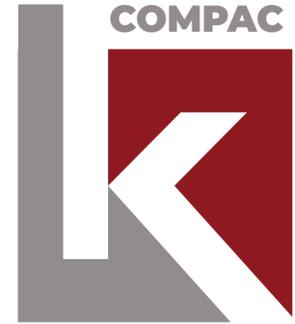

demonstrates expertise

provides strategic leadership
